Re: Immunization Requirements

Dear Parents and Guardians of incoming 7th graders,

The Ohio Department of Health recently revised immunization requirements for school attendance (ORC3313.671). Immunizations required to enter 7th grade include a booster dose of the Tdap vaccine. The Tdap vaccine helps protect your child from tetanus, diphtheria and pertussis (whooping cough). Also, required for entry into the 7th grade is 1 dose of Meningococcal Vaccine (serogroups A, C, W, and Y.)

If your child has already received these immunizations (most children have) or when your child receives them please provide proof of immunization. You may attach a copy of your child's immunization record or provide the date in the space below. Please return this information as soon possible and I will update your child's file.

As with other school immunization requirements, students who do not provide documentation of these immunizations are subject to exclusion from school. To avoid exclusion in the fall, I encourage you to check with your Primary Care Provider so you will have time to get these immunizations before the next school year.

If you have questions, please email me at mfaehnle@cducation.org

Thank You.

Michele Faehnle RN, BSN, LSN

St. Andrew School Nurse

Immunization dates must be on file for entry into 7th grade

Name of Student _____

Date of Tdap Booster _____

Date of Meningococcal Vaccine _____

Parent/Guardian Signature _____
